RoHS STATEMENT

Directive 2002/95/EC

AC&E Pty. Limited is a designer and supplier of quality Impedance Matching Devices commonly known as baluns to the Telecommunication Industry since 1992.

AC&E gained their ISO9001 (2000) Quality Assurance Standard in 1994 which has enhanced our production and design capabilities to the point where and we are known throughout the industry for our quality products.

We declare that all individual baluns manufactured after 1st of July 2005 are compliant to the RoHS Directive 2002/95/EC.

All multiple balun configurations are compliant to the above directive by means of the Network Infrastructure exemption. AC&E is making a concerted effort to change over all manufacturing equipment so as to fully comply with the above directive without the need for the Network Infrastructure Exemption.

Issued 04th of July 2005.

Rick Felton
Engineering Manager
AC&E Pty Ltd.
